## Corona Rings & Shield Manufacture

At Disha FabTech, we specialize in precision-engineered Corona Shields for high-voltage (HV) transformers, designed to minimize partial discharge and corona effects while ensuring optimal dielectric performance. Crafted from premium materials like conductive silicone rubber and epoxy composites, our shields feature advanced grading technology that uniformly distributes electric fields, extending transformer lifespan and enhancing reliability in demanding power grid environments. Backed by rigorous testing to IEEE and IEC standards, our solutions reduce maintenance costs and downtime for utilities worldwide—partner with us for unmatched protection against electrical stress.

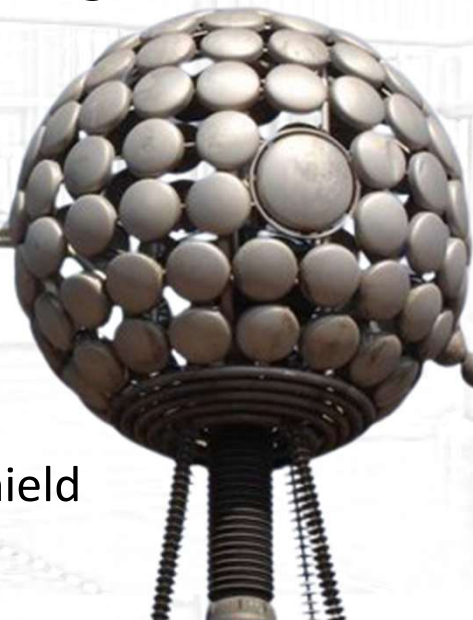

Range from 32 KVA to 1200KVA  
Pipe Dia 50mm Dia to 450mm Dia

## Corona Rings & Shields

Multi Disc Corona Shield

Half Sphere

## HV Connectors Capsules

## End Shield, Bushing Shields

COPPER SPHERE

ALUMINIUM SPHERE

This are a few products that we have made, for more Kindly Contact us by Email or Call us.
